

Joselyn Rodriguez

Food Engineer

Professional Profile – Joselyn Rodríguez

Joselyn Rodríguez is a food regulatory specialist with experience in the interpretation, application, and supervision of national and international standards within the food and beverage industry. She holds a degree from Universidad San Francisco de Quito, where she completed a subspecialization in Industrial Engineering, providing her with a strong technical and analytical foundation for regulatory and operational decision-making.

Regulatory Compliance and Technical Expertise

Joselyn has worked extensively with ISO standards implemented in Ecuador, including quality management, food safety, environmental management, and occupational health and safety systems. At Arca Continental, she reviewed and validated ISO requirements and INEN technical standards related to food and beverage products, ensuring strict regulatory compliance and supporting continuous improvement processes.

Operational Leadership and Management Experience

Her professional background also includes serving as a Food & Beverage Supervisor in North Carolina, United States, where she strengthened her leadership, operational management, and service-quality skills. This experience enhanced her ability to coordinate teams, maintain high safety and hygiene standards, and implement efficient workflows in fast-paced environments.

Technical Skills and Professional Strengths

Joselyn possesses advanced English proficiency, strong computer and analytical skills, and foundational knowledge of Python for process optimization and data analysis. Her combination of technical expertise and leadership ability contributes to achieving—and elevating—the highest standards within the food sector.
