

Valeria Jiménez
Food Engineer

Professional Profile – Valeria Jiménez, Food Engineer II

Valeria Jiménez is a Food Engineer trained at Universidad San Francisco de Quito (Ecuador), specializing in regulatory compliance for prepackaged food and non-food products across Ecuador, Chile, and Colombia. She has experience in nutritional labeling, regulatory analysis, ingredient verification, complementary labeling, technical labeling requirements, and comprehensive artwork evaluation to ensure full regulatory compliance in multiple markets.

Regulatory Compliance and Labeling Expertise

Valeria is responsible for preparing legally grounded regulatory reports, including warning seals, nutritional calculations, mandatory declarations, and technical labeling requirements. She conducts thorough compliance assessments to verify that products meet the applicable regulations and standards for each country.

Technical Skills and Process Optimization

She manages advanced traceability and control tools and uses Python to automate processes, streamline workflows, and optimize regulatory review operations. Her technical approach integrates analytical rigor, precision, and efficiency to enhance compliance procedures and reduce review times.

Specialized Training and Professional Competencies

Valeria has additional training in Good Manufacturing Practices (GMP), HACCP, ISO 22000, and Food Fraud, strengthening her ability to evaluate risks, validate processes, and ensure quality and safety standards. She also has advanced English proficiency, enabling her to work effectively with technical documentation and support international clients.
